

## ST-30 TILT SOLIDS STRAINER

### PROTECT YOUR DRAINS FROM BLOCKAGES

The Grease Guardian ST-30 Tilt solids strainer is designed to reduce or eliminate clogged drains, caused by excess build up of food solids, commonly found in busy restaurant kitchens. The ST-30 Tilt solids strainer is floor standing and works as a stand alone solids filter or a pre-filter to a centralized Grease Guardian. The ST-30 Tilt solids strainer is manufactured entirely in high quality stainless steel is supplied with support legs and floor anchor bolts. The small base footprint of 21" x 25", allows for convenient placing in mechanical rooms or basement rooms.

Coarse food particles such as sweetcorn, peas, slaw, vegetables and other food scraps, larger than 1/4" in diameter, will be trapped inside the ST-30 Tilt. To empty the solids filter simply pull on the handle and tilt the screen as shown in the picture below. From here the screenings are scraped into a trash receptacle.

\* The ST-30 Tilt Solids Strainer can be used to protect your existing grease trap. 4" flexible couplings for the inlet and outlet, are supplied with the screen.
