KITCHEN SOLIDS HANDLING

Food Guardian

SOLIDS STRAINER DS-1

BLOCKAGES ARE EXPENSIVE
DON'T LET FOOD SOLIDS BLOCK YOUR KITCHEN

The Grease Guardian DS-1 solids strainer is designed to reduce or eliminate clogged drains, caused by excess build up of food solids, commonly found in busy restaurant kitchens. The DS-1 solids strainers low profile design fits neatly and conveniently under sinks and shelf units.

Coarse food particles such as sweetcorn, peas, slaw, vegetables and other food scraps, larger than 1/8" in diameter, will be trapped inside the removable DS-1 drawer. In addition our unique removable microfilter will trap even the smallest of food particles such as rice and seeds.

The removable sliding drawer allows the end user to easily empty the collected solids into a trash receptacle.

The DS-1 is manufactured in high grade, durable, and long lasting stainless steel and offers a simple yet very effective solids handling solution for your kitchen.

* The DS-1 Solids Strainer can be used to protect your existing grease trap or to replace a garbage disposal unit.
